

CERTIFICATE IN RUBBER TECHNOLOGY

Introduction

- This is 18 months (full time) certificate program to be offered to SPM / SPMV / equivalent qualification leavers with the aim of producing competent rubber technologies at supervisory levels to fulfill the demand from the rubber and related industries.

Program structure

- The curriculum of this program is designed to cover all aspects of rubber technology in theories as well as hands on.
- The learning methodologies are through classroom lecture and practical activities that include practical laboratory, workshops and final projects that will be based on problem-solving in processing and manufacturing technologies.

Career prospects

- Nine students have passed the courses that ended on March 30, 2012.
- A total of 7 students were employed in the rubber products manufacturing company, a student was absorbed as permanent staff at LGM and a student is pursuing degree in part time mode at SPACE, UTM.
- Here are the names of students who have graduated and their employment status.
